

DRAWING 1 - AN OVERVIEW OF THE SOFTWARE LOGIC (Drawing one of one)

This is the only drawing (or flow chart) for the provisional application for Patent for software which converts text-to-speech from any language to any language on any device. It can convert the text from any language into any language and show related photos or videos related to the speech. This was filed by Mark R. Haley, the sole inventor. Call Mark R. Haley at 972-303-4433 if there are any questions.

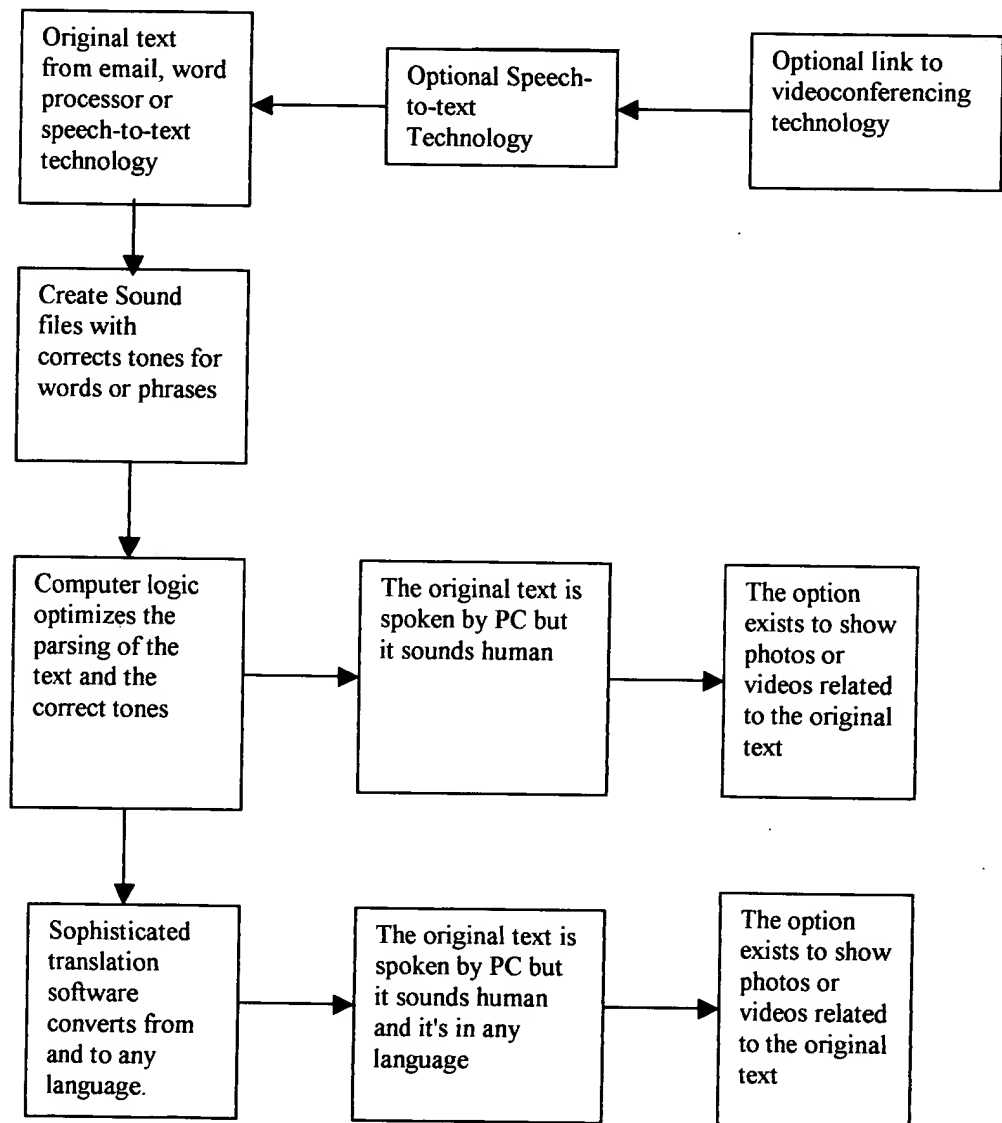

FIG. 1 is a flowchart of the software logic.
